Open public title page Workflow How to prepare an institutional inquiry The current workflow is human-reviewed through the public support route. It does not collect private data on this page or promise commercial terms. Identify titles of interest Start with the public catalog, audience page, or topic guide. Note the exact public title and public URL rather than any internal project reference. Gather institution context Prepare the institution name, audience served, preferred format, intended use, and any accessibility or policy question that should be considered. Use the current support channel Send the inquiry through the publishing contact path listed on the relevant page. No account, upload, checkout, or automated form is active. Confirm what is public today Veristio Press can point to public catalog pages, admitted Amazon links, available public descriptions, author information, and current support and policy pages. Flag items for individual review Wholesale terms, review copies, classroom permissions, samples, library metadata, distributor details, and custom institutional workflows require separate owner decisions. Keep next steps truthful The present workflow is a human publishing inquiry path. It does not promise response times, discounts, stocking, invoicing, shipping, platform access, or adoption status. Current boundary What Veristio Press can confirm today Veristio Press can point to public title pages, author information, current public Amazon links, support and policy pages, and the downloadable sheets above. Wholesale terms, library metadata packets, review or examination copies, classroom permissions, samples, and distributor-specific records require individual owner review before they can be published.
